

Safe and Sound WiFi Kill Switch With Timer Operation Manual

INSTRUCTIONS

1. Shut power to source of POE (Point Of Ethernet)
2. Connect cable from POE source into plug labeled "POE Switch" on timer
3. Connect cable from device requiring timed power into plug labeled "Equipment" on timer
4. Ensure mode switch is set to A (toggle switch on bottom of timer)
5. Power on POE source

To activate power and connectivity from switch, select a specific time interval (30, 60, 90, or 120 Min).

To shut off power and connectivity to device select OFF.
